Description

Cloud Q Car Seat by **Cybex** with SensorSafe, is the rear-facing infant carrier builds and improves on the strong tradition of previous CYBEX premium infant car seats, with a ground-breaking, ergonomic design offering a full-recline position outside of the car. The result is a perfect symbiosis of phenomenal protection

and a new kind of travel system for outstanding safety inside and outside of the car. The Cloud Q rear-facing infant car seat easily converts to a full-recline position outside of the car. This innovative seat is complemented by a telescopic linear side-impact protection system, full-recline angle also inside the car, and an XXL canopy offering sun protection with UVP50+. The 11-position height-adjustable headrest of the infant car seat simultaneously changes the harness length and sitting angle. As a result, the infant car seat grows with the child.

- ergonomic design with full-recline position outside of the car
- removable newborn inlay for premature and very small babies
- 11-position height-adjustable headrest with integrated harness guides
- telescopic Linear Side-impact Protection (L.S.P. System)
- integrated XXL foldaway sun canopy
- travel system ready by adding CYBEX and other brand strollers
- base included with load leg

The new models have the SensorSafe 2.0 technology integrated into the chest clip of the Cloud Q sends alerts to both a vehicle receiver and a smartphone. The alerts notify parents when the child has been accidentally left in the car, helping to avoid unthinkable tragedies. Alerts also sound when the child unbuckles themselves in a moving vehicle, when a child has been seated for too long, and when the back seat has become too warm or cool.
